Dear Practice Owner,

I write to introduce myself and reach out to discuss available Podiatrist Positions in Washington State or the Pacific Northwest. As a graduate of the University of Washington in 2010, I spent roughly five years in research before discovering podiatry. This led me on a journey to Kent State University College of Podiatric Medicine in Ohio where I was involved with many extra-curricular activities. I graduated with Pi Delta Honors. I will be graduating from 3-year PMSR/RRA residency as Chief Resident at Long Island Jewish Hospital at Northwell Health in June 2022.

As part of residency training, I covered multiple hospital locations along with various surrounding surgery centers on long island New York which led to a strong, well-rounded foundation in all pathologies in the foot and ankle, including high energy trauma, lateral ankle stabilization, different bunion procedures including MIS, flat foot correction, arthroscopy, wound care, Charcot reconstruction, and diabetic limb salvage. I have experience in multiple wound care clinics, private offices, in-patient and out-patient care settings. Queens, New York is the most diverse region of the world and I have had opportunities to treat patients from many different cultures, and I value establishing relationship on a personal level. I have completed the ACFAS arthroscopy course, AAFAO basic, AAFAO comprehensive, Baltimore Limb Deformity Course, and have presented posters at the annual ACFAS and APMA National. I have been involved in research and recently published an article in JFAS.

My training up to this point has created a solid foundation for me to become a contributing member to any practice. I am looking for a well-rounded position in the Pacific Northwest in which I can bring my training and work ethic to help your practice grow and with the hope to become a partner in the future.

Thank you for your review of this cover letter and resume. Please reach out if you will be looking for a new associate in July 2022.

Sincerely,

Brandon Rogers, DPM
