FROM

**Kyle Villaruz**

Podiatry Resident, PGY-3

My name is Kyle Villaruz, and I'm in my final year of residency acting as co-chief resident at the Hunt Regional Medical Center program in Greenville, TX, training under director Dr. Steven Brancheau. I'm from the Pacific Northwest, born and raised in Washington state. I completed my undergraduate study at the University of Washington before moving to Philadelphia where I attended TUSPM. It is a goal to return to the Pacific Northwest after completing residency. Another goal is to join a thriving foot and ankle practice and become an integral member in its advancement. I aspire to remain with the practice long-term.

Throughout residency, I have had the privilege to work alongside attendings throughout the greater north Dallas area, gaining heavy exposure to elective surgery including forefoot and rearfoot reconstruction. I have received extensive training in foot and ankle trauma, sports medicine, biomechanics, and diabetic limb salvage. I have had the opportunity to experience various work environments including large urban and rural community health systems, as well as private practice.

I feel that my residency has prepared me to excel clinically and in surgery. I'm excited for this next chapter, and I'm confident that I can be an asset to this practice. I bring a strong work ethic with a laid-back personality. One of the things I look forward to most in future practice is establishing a strong connection with my patients and providing them quality care. I believe the goals of your practice are in alignment with my own and I hope to explore the opportunity to work together.
